

# Rewrite regeln

## Suchmaschinenfreundliche Urls

```
# Enable Rewrite Engine  
RewriteEngine on
```

```
#Create friendly URL  
RewriteRule ^site$ site.html [L]
```

bzw:

```
RewriteEngine on  
RewriteCond %{REQUEST_FILENAME} !-d  
RewriteCond %{REQUEST_FILENAME}\.html -f  
RewriteRule ^(.*)$ $1.html  
# Replace html with your file extension, eg: php, htm, asp
```

für php dann eben so:

```
RewriteEngine on  
RewriteCond %{REQUEST_FILENAME} !-d  
RewriteCond %{REQUEST_FILENAME}\.php -f  
RewriteRule ^(.*)$ $1.php
```
